## Red Zone

**Hand Hygiene**
- Required before and after contact with patient or patient environment, as well as before and after donning and doffing Personal Protective Equipment (PPE).
- Extended use for all patient interactions.
- Change when damp, soiled, damaged and after breaks.

**Procedure Mask**
- Extended use for all patient interactions.
- Retain for full shift.
- When removed, clean, disinfect, and store per protocol.
- Dispose if scratched or damaged.

**Gloves**
- Per Routine Practices and Additional Precautions, e.g. MRSA, scabies, blood and body fluid contact or excessive soiling.
- Change between patient encounters.
- Perform hand hygiene before donning AND after doffing.
- See specific instructions for COVID-19 Unit.

**Gown**
- Extended use for all patient interactions.
- Change between patient encounters.
- Change when damp, soiled, damaged.
- See specific instructions for COVID-19 Unit.

**Eye Protection**
- Required for Aerosol Generating Medical Procedures (AGMPs); extended use for repeat encounters with multiple patients (except intubation).
- Required to be provided for direct patient care; health care worker may choose to instead wear a procedure mask for non-AGMP care following completion of Point of Care Risk Assessment (PCRA).
- Change when damp, soiled, damaged, at breaks, and/or post-intubation.
- Do not reuse.

**N95 Respirator**
