1 Introduction

The purpose of this document is to provide an overview of the Interprofessional Team Data Extract. The document will describe the technical details and requirements regarding the documentation of encounters with non-physician providers and extraction of data.

1.1 Glossary

The following defines key business terms and acronyms used throughout this document.

<table>
<thead>
<tr>
<th>TERM OR ACRONYM</th>
<th>DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Client</td>
<td>A client is an individual seeking and receiving health-care services. May be interchanged with term “patient”.</td>
</tr>
<tr>
<td>Interprofessional Team Demonstration Initiative (ITDI)</td>
<td>A Manitoba primary care initiative in support of the Family Doctor for All commitment.</td>
</tr>
<tr>
<td>Manitoba Certified EMR Product (EMR)</td>
<td>An Electronic Medical Record product that has achieved Certification in Manitoba, and is referred to throughout this document as “EMR”.</td>
</tr>
</tbody>
</table>

1.2 Business Objectives & Benefits Summary

The Interprofessional Team Demonstration Initiative (ITDI) is a Manitoba primary care initiative in support of the Family Doctor Finder commitment. Family Doctor Finder can make it easier for Manitobans to find a team of healthcare professionals (including family doctors and/or nurse practitioners) within Home Clinics to provide a home base for their health care needs. As a key strategy supporting this commitment, ITDI provides funding to fee-for-service practices to hire non-physician resources (e.g. physician assistant, nurse, nurse practitioner and others). These resources become part of the interprofessional team within the Home Clinic, thereby increasing the number of patients provided ongoing care through that practice.

The Interprofessional Team Data Extract (ITDE) extracts data from Certified EMR Products which can be submitted to Manitoba Health, Seniors and Active Living (MHSAL). This enables evaluation of ITDI and the scope of care provided by interprofessional teams.

2 Interprofessional Team Data Extract Overview

Key solution features in scope include:

- Documentation of encounters with non-physician providers
- Interprofessional team data extract generation

3 Interprofessional Team Data Extract Use Cases

The use cases in this section describe functionality required of the EMR product. They are supported by the requirements detailed in this specification.

![Figure 1: High-Level Use Cases](image_url)
3.1 Document Visit (UC-001)

This use case describes the process to document a visit.

**PRIMARY ACTORS**
- EMR
- Non-Physician Provider

**TRIGGER(S)**
- A Client arrives and is scheduled to see a Non-Physician Provider

**PRE-CONDITIONS / INPUTS**
- EMR functionality has met the certification, business and technical requirements to leverage the Interprofessional Team Data Extract

**POST-CONDITIONS / OUTPUTS**
- NonPhysicianProvider documents visit electronically

**MAIN SUCCESS SCENARIO (BASIC FLOW)**
1. Non-Physician Provider documents visit with specifying the following visit details:
   - Physician Attended Visit
   - Visit Diagnosis
   - Visit Procedure
2. EMR saves visit details.

3.2 Generate Extract (UC-002)

This use case describes the process generate the extract.

**PRIMARY ACTORS**
- Clinic
- EMR

**TRIGGER(S)**
- Clinic has a accesses the generate the extract functionality

**PRE-CONDITIONS / INPUTS**
- EMR functionality has met the certification, business and technical requirements to leverage the Interprofessional Team Data Extract

**POST-CONDITIONS / OUTPUTS**
- Extract is saved to an accessible location

**MAIN SUCCESS SCENARIO (BASIC FLOW)**
1. Clinic specifies extract details:
- Clinics or sites
- Non-physician providers
- Date range
2. EMR saves extract to an accessible location.

3.3 Transmit Extract (UC-003)

The Transmit Extract use case is outside the scope of the Interprofessional Team Data Extract Specification. As part of standard workflow, clinics will submit the generated extract through an agreed upon method with MHSAL.

4 Interprofessional Team Data Extract Requirements

This section includes mandatory requirements and guidelines for configuring an EMR to generate the Interprofessional Team Data Extract.

4.1 Requirement Column Definition

For ease of review and understanding, requirements are documented in a manner consistent with previous EMR Certification documentation. For each requirement, the following information is provided:

- **ID** – a unique identifier assigned to the requirement by Manitoba.
- **Requirement** – a concise statement describing the requirement.
- **Guidelines** – these additional instructions constitute part of the requirement and are relevant to implementation of the requirement in the EMR product. As such, these guidelines form part of the assessment criteria and are included in the planned product assessment.
- **Additional Notes** – relevant information or examples intended to give additional context to the requirement and to improve understanding.
- **Status** – each requirement is clearly identified as:
  - New (not included in previous specifications);
  - Updated (modification to intent of the requirement from a previous version); or
  - Previous (unchanged from last issuance of core requirements).
- **Assessment** – The method of assessment is stated in the “Assessment” column for each requirement. All requirements will be assessed using the following method:
  - Verification – leveraging the Certification Environment, Manitoba will verify the product’s ability to meet requirements. Clinical and administrative resources may be involved in the verification process
  - Demonstration – Vendors will demonstrate key functions within their EMR product. Demonstrations may be conducted in person, by remote means (e.g. teleconference and Internet) or through recorded video.
### 4.2 General Requirements

</thead>
<tbody>
<tr>
<td>ITDE-01</td>
<td>1</td>
<td>Clinic Identifier</td>
<td>An identifier assigned by Manitoba to identify the clinic. Value must be consistent with the EDTR Clinic Identifier. Used to identify the clinic or site submitting ITDI information.</td>
<td>Type: Character Format: ####</td>
<td>Previous</td>
<td>Demonstration</td>
</tr>
</tbody>
</table>
| ITDE  | 2   | Visit Date | Date on which the patient-provider encounter occurred. Supports analysis over time. | Type: Character  
Format: MMDD YYYY | Previous | Demonstration |
|-------|-----|------------|------------------------------------------------------------------------------------------------|---------------------------------|----------|----------------|
| ITDE  | 3   | Provider Identifier | The identifier for the provider delivering primary care services during the patient-provider encounter. For physicians, this would be their billing ID but for other providers, this will be another identifier. Uniquely identifies the provider of health-care services for an encounter. | Type: Alphanumeric  
Format: dependent upon EMR values | Previous | Demonstration |
| ITDE  | 4   | Provider Type | Represents the occupation of the provider. Identifies the occupation of the primary care providers associated with ITDI. | Type: Character | Previous | Demonstration |
| ITDE  | 5   | Physician Attended Visit | Specifies, on a per encounter basis, if a physician attended during the non-physician provider encounter.  
Identifies if the service provider was supervised for an encounter. | Type: Character  
Format: 1 = Yes, 2 = No, Blank = not captured | Previous | Demonstration |
| ITDE  | 6   | EMR Patient Identifier | The unique identifier assigned to the patient's record by the EMR.  
Used for traceability. | Type: Alphanumeric  
Format = dependent upon EMR values | Previous | Demonstration |
<p>| ITDE  | 7   | Patient Identifier Type | Represents the type of patient identifier. | Previous | Demonstration |</p>
<table>
<thead>

<td>Postal Code</td>
<td>The postal code of the patient’s permanent residence.</td>
<td>Character</td>
<td>A#A#A#</td>
<td>Previous</td>
<td>Demonstration</td>
</tr>
<tr>
<td>ITDE-12</td>
<td>12</td>
<td>Visit Diagnosis</td>
<td>The specific diagnosis related to this encounter. Multiple VisitDiagnosis codes may be represented by using a semi-colon as a separator (e.g. 5999;2810;25000)</td>
<td>Character</td>
<td>ICD-9 code</td>
<td>Previous</td>
<td>Demonstration</td>
</tr>
<tr>
<td>ITDE-13</td>
<td>13</td>
<td>Visit Procedure</td>
<td>The procedure performed during this encounter. Multiple VisitProcedure codes may be represented by using a semi-colon as a separator (e.g. 8529;8425;8422)</td>
<td>Character</td>
<td>Numeric tariff as per Manitoba Health</td>
<td>Previous</td>
<td>Demonstration</td>
</tr>
<tr>
<td>ITDE-14</td>
<td>14</td>
<td>Type of Appointment</td>
<td>The type of appointment as defined by the clinic or provider related to this encounter. Used to understand the scope of services being delivered by the non-physician provider.</td>
<td>Type: Character</td>
<td>Previous</td>
<td>Demonstration</td>
<td></td>
</tr>
<tr>
<td>ITDE-15</td>
<td>15</td>
<td>Reason for Visit</td>
<td>Represents the reason for the encounter as expressed by the patient. Used to understand the scope of services being delivered by the non-physician provider.</td>
<td>Type: Character</td>
<td>Previous</td>
<td>Demonstration</td>
<td></td>
</tr>
<tr>
<td>ITDE-16</td>
<td>16</td>
<td>Appointment Start Time</td>
<td>The scheduled start time for the appointment related to this encounter.</td>

6 Appendix B: Release Notes

*Version 1.0 December 1, 2015*
- Initial release

*Version 1.1 March 31, 2020*
- Updated document theme to new organizational visual identity
- Added Glossary
- Moved Introduction section to the new Business Objectives & Benefits Summary section
- Moved Scope to the new Interprofessional Team Data Extract Overview section
- Removed out-of-scope section and added a Transmit Extract Use Case which communicates it is out of scope
- Aligned Use Cases to the organization standard
- Updated all requirements with a status of previous
- Added table references to all tables
- Added Appendix A: Use Case to Requirement Traceability
- Added Appendix B: Release Notes
