Re: COVID-19 – Incident Command

As you may know, Manitoba's response to COVID-19 is being provincially coordinated and led by Dr. Brent Roussin and Lanette Siragusa. Many working and planning groups are reporting into the command table, with decisions and recommendations being made daily.

These decisions, guidelines and new materials are being shared with you daily by Beth Beaupre to ensure you have access to the information and guidance from the public health and clinical leaders who are informing Manitoba's response.

As regulatory bodies you are encouraged to take these materials and share them with your members as you deem appropriate. You are further encouraged to use the most up-to-date guidance to inform your organization's decisions and actions.

We ask that if you unclear or uncertain about an action you are contemplating or the interpretation of a decision or guideline you are encouraged to request clarification whenever it is required. Please contact me directly and I will consult with the incident command group, as necessary.

Thank you very much for your ongoing support.

Dr. Brock Wright
